

Nikhil Singh

Software Engineer | Full-Stack Developer

Indore, MP | baghelnikhil911@gmail.com | +91-9755716505 | LinkedIn | LeetCode | GitHub

Professional Summary

Full-Stack Developer specializing in the **MERN** stack with experience in **React**, **Next.js**, **Node.js**, and **PostgreSQL**. Skilled in building scalable applications with secure **REST APIs** and cloud deployments using **AWS**, **Docker**, and **Kubernetes**.

Technical Skills

Programming Languages: JavaScript, TypeScript, SQL

Core CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS

Frontend Technologies: React.js, Next.js, Redux, CSS3

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, MySQL, Prisma

Cloud & Deployment: AWS (EC2, S3), Vercel, Docker, Kubernetes

Automation & AI Tools: n8n, Vapi (Chat & Voice Agents)

Tools: Git, Firebase, Cloudinary, Razorpay

Education

Oriental University, Bachelor of Technology (B.Tech) in Computer Science
Indore, India

Sept 2022 – May 2026

CGPA: 7.1 / 10

Experience

Software Engineer Intern (React), Alphawizz Technologies

Jan 2025 – Jun 2025

- Built and optimized **React.js** UI components, reducing re-renders and improving performance by **20%**.
- Implemented scalable state management using **Redux** and integrated secure **RESTful APIs** with **Axios**.
- Collaborated in an **Agile/Scrum** environment to deliver features within deadlines.

Projects

DevWorld — MERN Stack Platform

Live Demo

- Developed a MERN-based developer matchmaking platform with authentication, payments, and real-time chat.
- Integrated **Firebase Auth**, **Redux**, **Socket.IO**, and **Razorpay**; deployed on **AWS EC2** using **Nginx**.
- Designed **RESTful APIs** and optimized backend workflows to support scalable user interactions.

Karya — Project Management SaaS

Live Demo

- Built an **Asana-like project management app** with real-time collaboration using **React** and **Socket.IO**.
- Designed a **PostgreSQL** database with **Prisma ORM**, **RBAC**, **JWT** authentication, and **Cloudinary** uploads.
- Deployed using **Docker Compose**, **Nginx**, and **GitHub Actions CI/CD** on a VPS server.

NovaChat AI — GenAI Chat Platform

Live Demo

- Built a **GenAI chat app** using **Next.js** and the **Google Gemini API**, supporting **real-time streaming responses**.
- Implemented **JWT** and **Firebase OAuth** authentication backed by **Prisma** and **PostgreSQL**.
- Passed the last **100 messages as history per request**, ensuring accurate **multi-turn conversational context**.

Training & Certifications

Namaste Dev — Full-Stack Development (React.js, Node.js, JavaScript)

- Completed industry-focused training in **JavaScript**, **React.js**, and **Node.js** for full-stack development.
- Gained hands-on experience with asynchronous JavaScript, RESTful APIs, and reusable UI components.
- Deployed applications on **AWS (EC2)**, configured **Nginx**, and implemented automated **CI/CD** pipelines.
